MENT TECH

MENT TECH, the World's Leading Blockchain Products & Services Provider

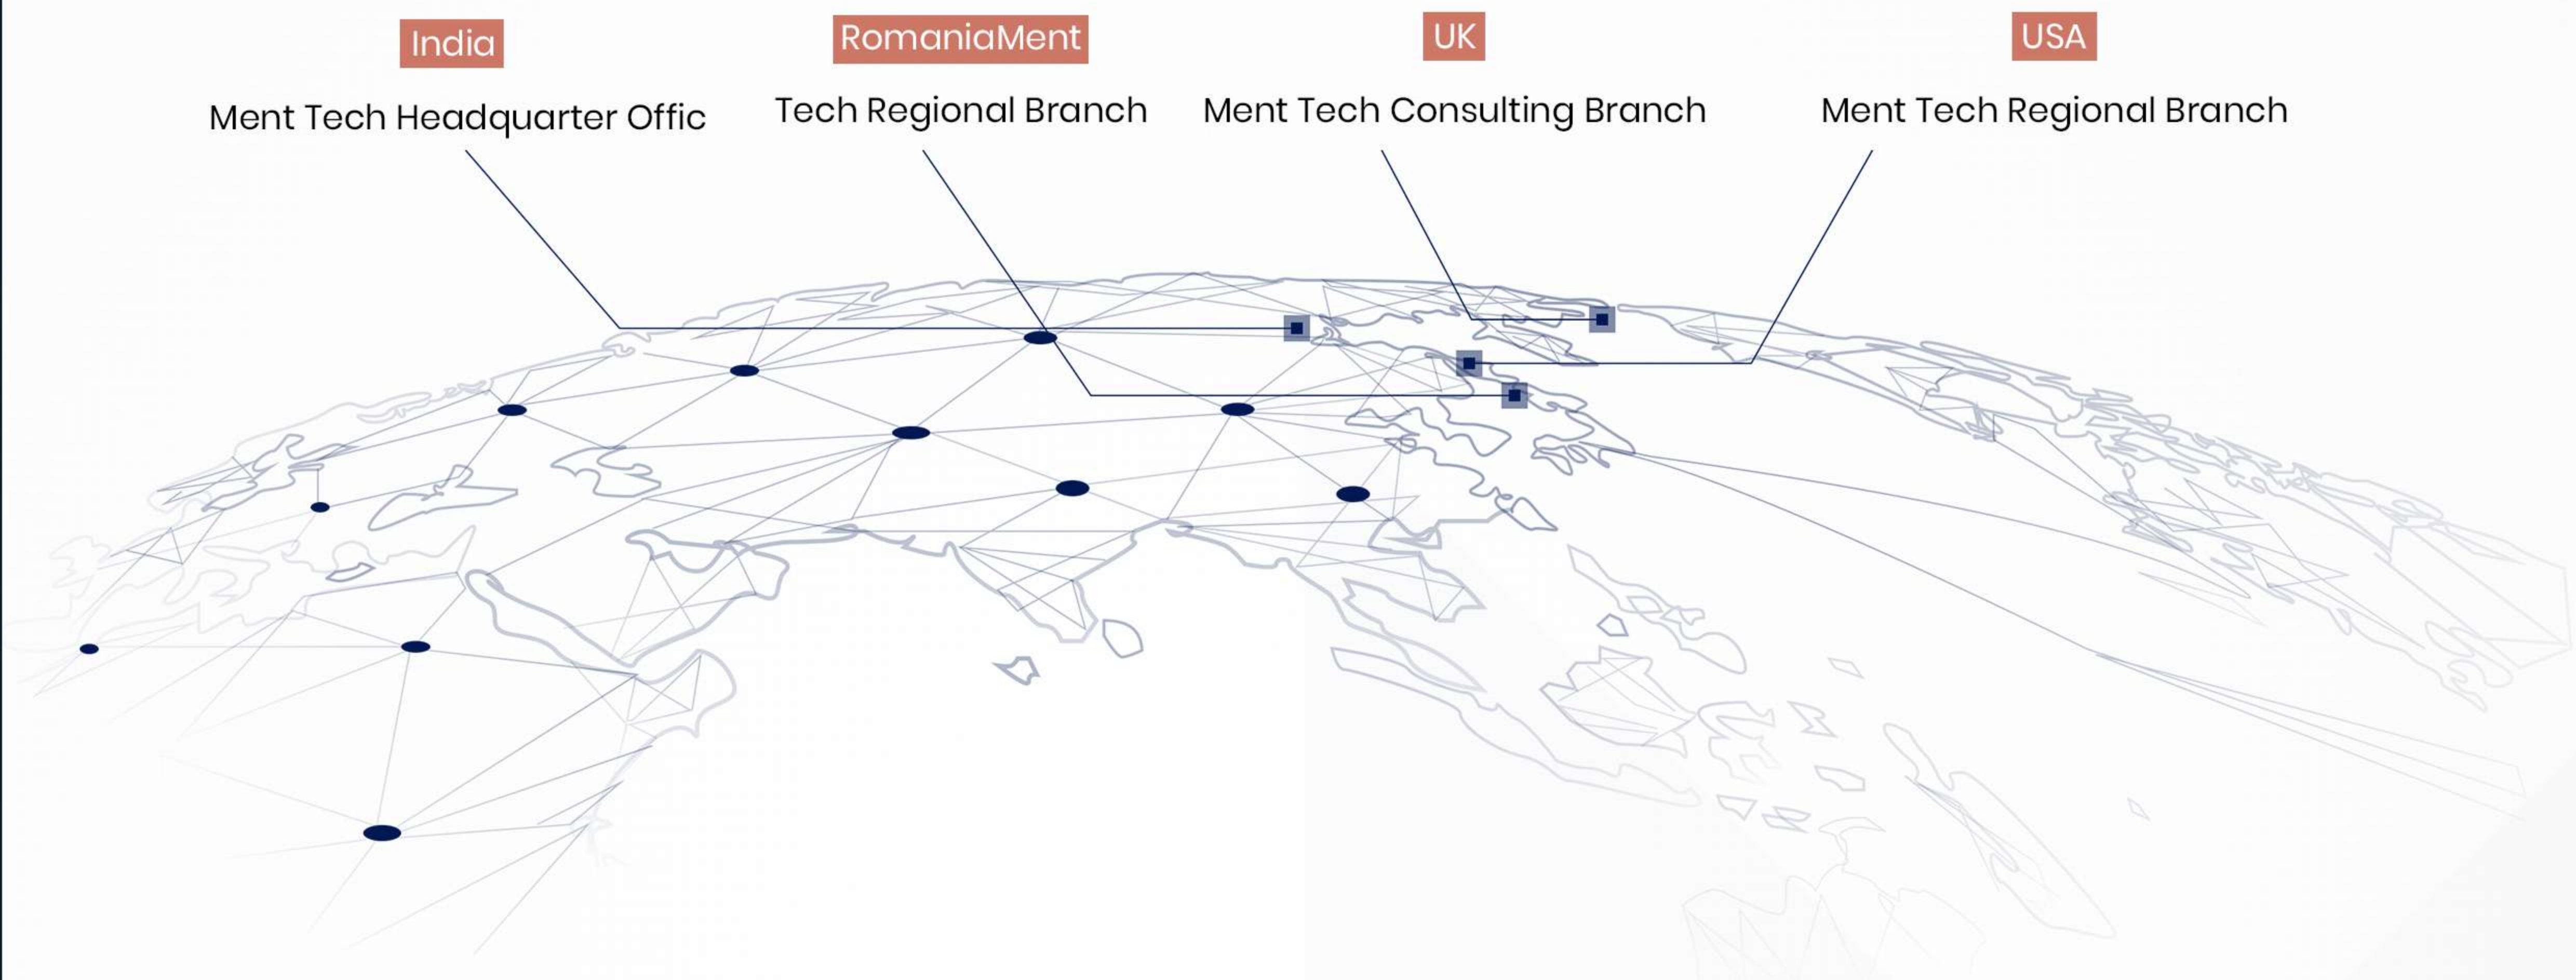

Founded in 2018 and headquartered in India, Ment Tech is a world-leading Blockchain technology service provider. At present, Ment Tech has 9 mature product lines: Spot Trading System, OTC Trading System, Liquidity Aggregation Bot, Mining Pool System, All-In-One Wallet System, Referral System, Leverage And Margin Trading System, Cryptocurrency Staking System, IEO/STO/ICO platform with related white label solution as well. Ment Tech implements the collectivization and globalization operation strategy, with offices set up in the UK, Romania, and the US, in addition to its headquarters in India. Up to now, Ment Tech has provided Blockchain products & services to more than 500 clients around the globe, including 300+ crypto exchange clients, 100+wallet clients, 150+ liquidity clients, and 60+ derivatives clients, covering over 20 countries in Southeast Asia, Europe, the United States, the Middle East, and other regions, and over 50 million users.

Our mission is to create the most Transparent, Secure and Trusted Hybrid exchange so that crypto traders can trade peacefully while we do the work. We have carefully designed the product which takes care of all your trading needs and provides you most advanced trading experience in the most intuitive manner. We don't want to restrict ourselves to just an exchange, with your support we want to contribute to this ecosystem, support technology backed ICOs, STO's and IEO's, support blockchain entrepreneurs and build solutions that will power the future digital economy. We believe, this can be made possible when we join hands and work along with the government to increase it's real-life adoption. We will always remain compliant with the government rules and regulations in the country where we operate.

We are a team of passionate blockchain enthusiasts based out of India.

Ment Tech Milestone

September

Ment Tech was officially established in India.

September

Ment Tech set up its UK Office.

October

The first exchange client got online.

January

More New Products are introduced for sales.

February

Mining Pool System Solution was introduced for sales.

March

OTC Trading System was introduced.

April

Romania regional office has been started.

May

All-In-One Wallet System was added in white-label solution.

June

Funded with \$400,000 in seeds.

2018

May

Have served more than 50 clients.

July

Ment Tech wallet solution was officially launched online.

August

The cloud exchange system was launched online.

October

The futures contract system was launched online.

October

We have served clients from more than 10 countries in Europe.

November

We have served more than 150 clients.

November

Global tour activities was launched, with the global partner recruitment plan initiated.

December

White-Label Solution was introduced.

2019

2020.

PRODUCTS & SOLUTIONS

MENT TECH, the World's Leading Blockchain Products & Services Provider

CRYPTOCURRENCY PRODUCTS OVERVIEW

We have spent many years building our product ecosystem to deliver modules ready to deploy. This means we can offer you ultra-competitive pricing and great execution on a wide selection of modules. Our products & solutions are incomparable in the industry.

CRYPTOCURRENCY EXCHANGE TURNKEY SOLUTION

Launch an exchange business with a spot matching engine for trading on popular cryptocurrencies. An ideal way to capitalise on today's trends by offering your clients trading on crypto-crypto and crypto-fiat pairs.

OTC TRADING SYSTEM

In Over-the-counter (OTC) trading, we offer deeper liquidity and a private, more personalized service to institutions and high net-worth individuals needing to fill large orders.

LIQUIDITY AGGREGATION BOT

Our leading liquidity system provides liquidity of over 100 mainstream currency pairs and popular currency pairs, as well as top trading depth and continuous K-line charts.

MINING POOL SYSTEM

Start mining with your own ASIC hardware and benefit from our high payouts. Mine 100+ assets easily on the cloud with your device, or plug your own hardware into the high paying mining pool.

ALL-IN-ONE WALLET SYSTEM

Our all in one wallet system provides Peer to peer transactions and auto sync technology keeps the wallet all time synced to your exchange wallet. Supporting TOP100 + main chain currencies by a single wallet, greatly

CRYPTOCURRENCY STAKING SYSTEM

Our non-custodial staking and De-Fi lending infrastructure enables investors to earn a yield on the widest variety of crypto assets. With support for 100+ assets and deliver rewards across the broadest range of crypto

LEVERAGE AND MARGIN TRADING SYSTEM

Our spot leveraged trading system with bidding trading mechanism shares the depth of positions with spot transactions, providing users with short-term lending for supporting the capital turnover.

REFERRAL & AFFILIATE SYSTEM

Our referral and affiliate system let you users bring traffic to your business in return of great crypto awards. Referral and affiliate system is the best way to enhance your business these days.assets.

OUR PRODUCTS & TURNKEY SOLUTIONS EXPLAINED

Ment Tech is a world-leading white label exchange solution provider. This page gives a detailed introduction of Product portfolios, risk control system, applicable teams and deployment process.

CRYPTOCURRENCY EXCHANGE TURNKEY SOLUTION

Ment Tech is a world-leading white label exchange solution provider. This page gives a detailed introduction of Product portfolios, risk control system, applicable teams and deployment process.

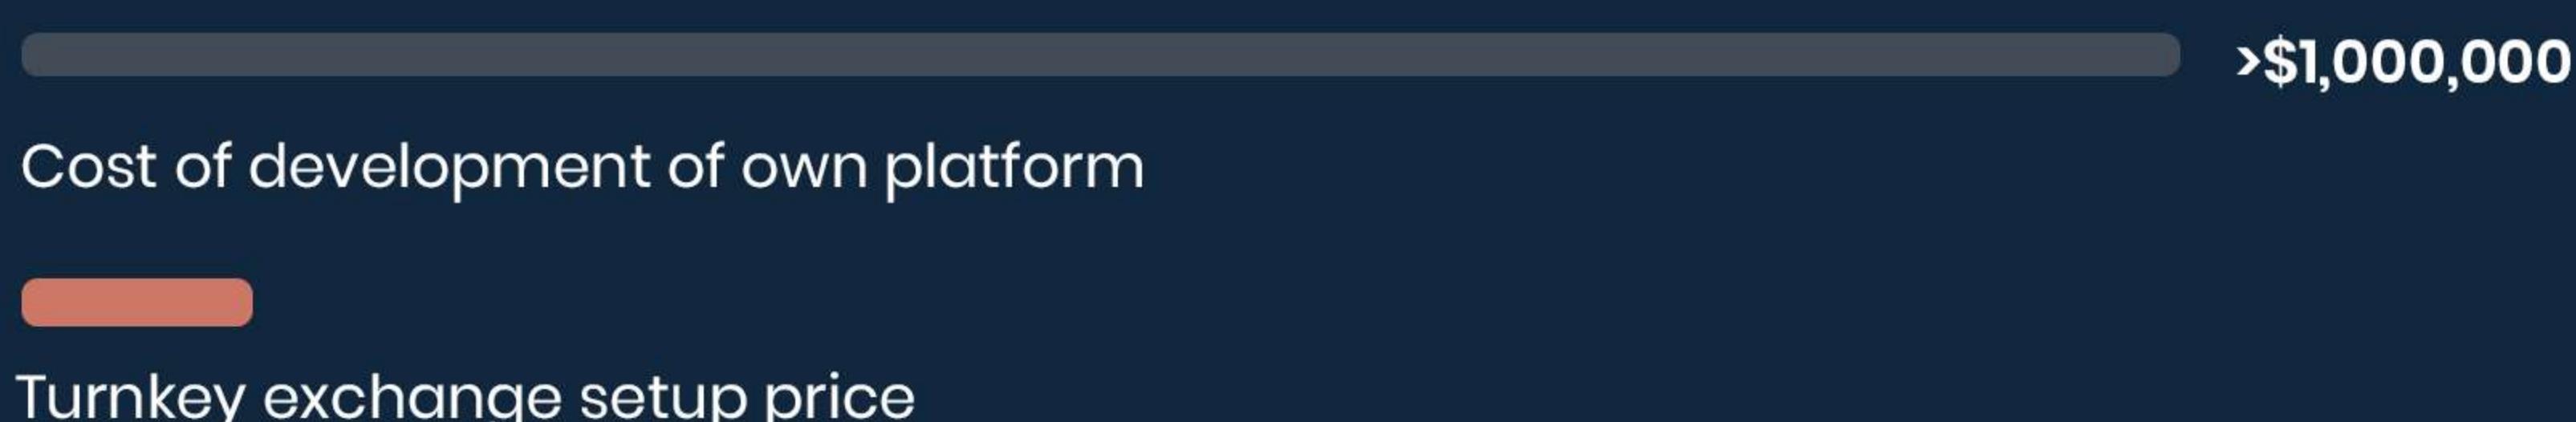

ADVANTAGES

A Turnkey cryptocurrency exchange is a great choice for getting started. Simplicity of maintenance and assistance along with cost-effectiveness are just a few of the many benefits available.

A SUPER COST-EFFECTIVE SOLUTION

A cryptocurrency exchange turnkey solution is a super cost-effective and time-saving solution as it is based on a Cryptocurrency Exchange Turnkey Solution. You can save more than \$900,000 on setup costs and around \$25,000 on ongoing monthly costs for development, extra office space and a technical support team. As well as huge cost-savings, you can launch more than one year faster

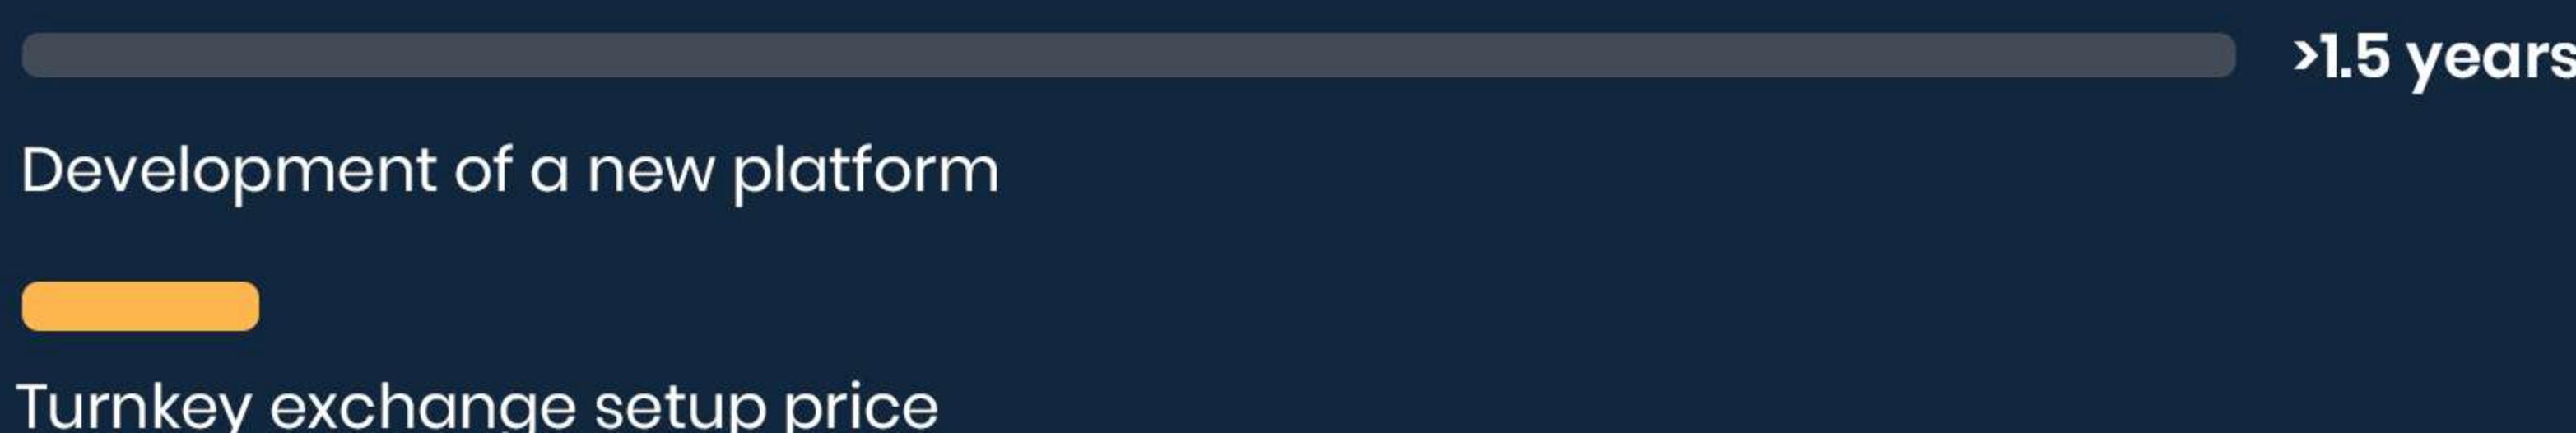

Initial investments

Monthly payments

Time to launch

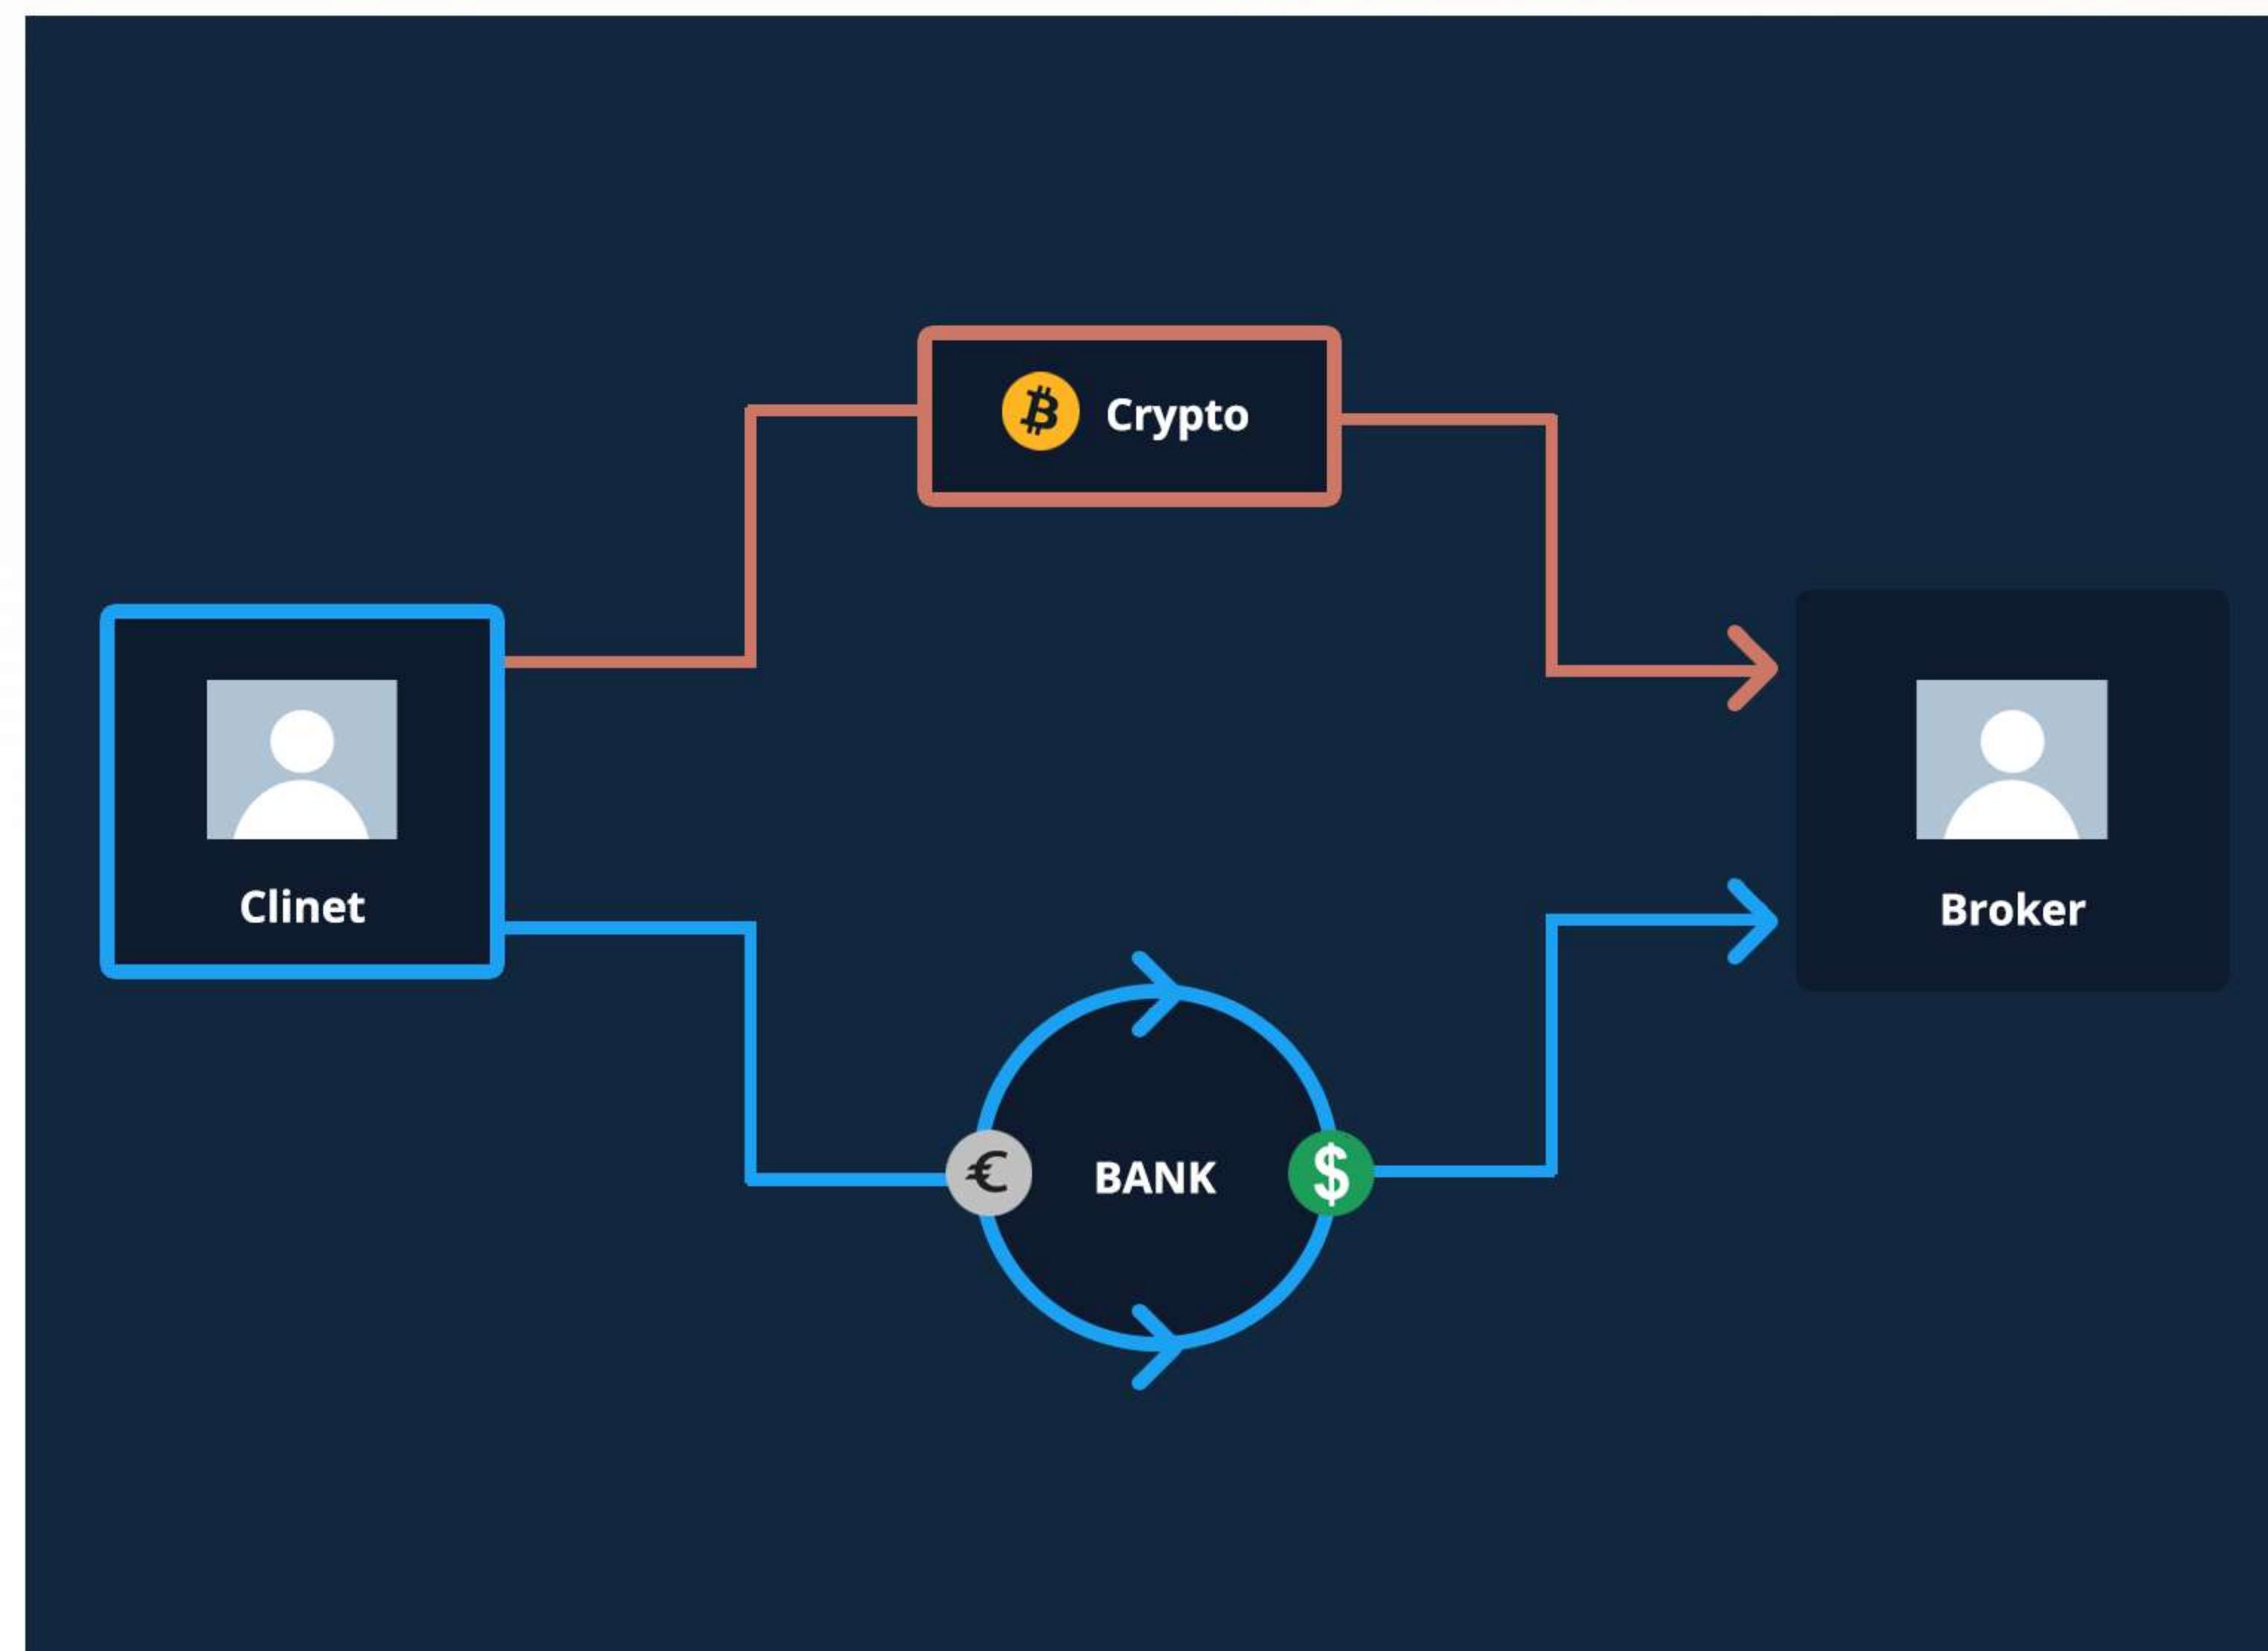

Don't waste your time and huge budgets on the development of your own cryptocurrency exchange. Boost your chances of success by launching your business more than 1 year faster and spend the money you save on marketing and legal services. Remember, it's never too late to start your own development once you have confirmed demand from real customers.

NO BANKS AND NO CHARGEBACK FRAUD

Simplicity of acceptance and ease of international transfers are two good reasons to integrate cryptocurrency payments. There's no need to open a bank account which can be a lengthy process without having a respected licence.

Accepting deposits and making withdrawals via cryptocurrencies is many times cheaper than any other fiat payment systems, giving you the opportunity to offer additional bonuses or benefits to your clients.

GET A HIGHER ROI WITH FASTER AND CHEAPER MONEY TRANSFERS

Bank transfers

\$ accept check aprove transfer < 1week

Cryptocurrency transfers

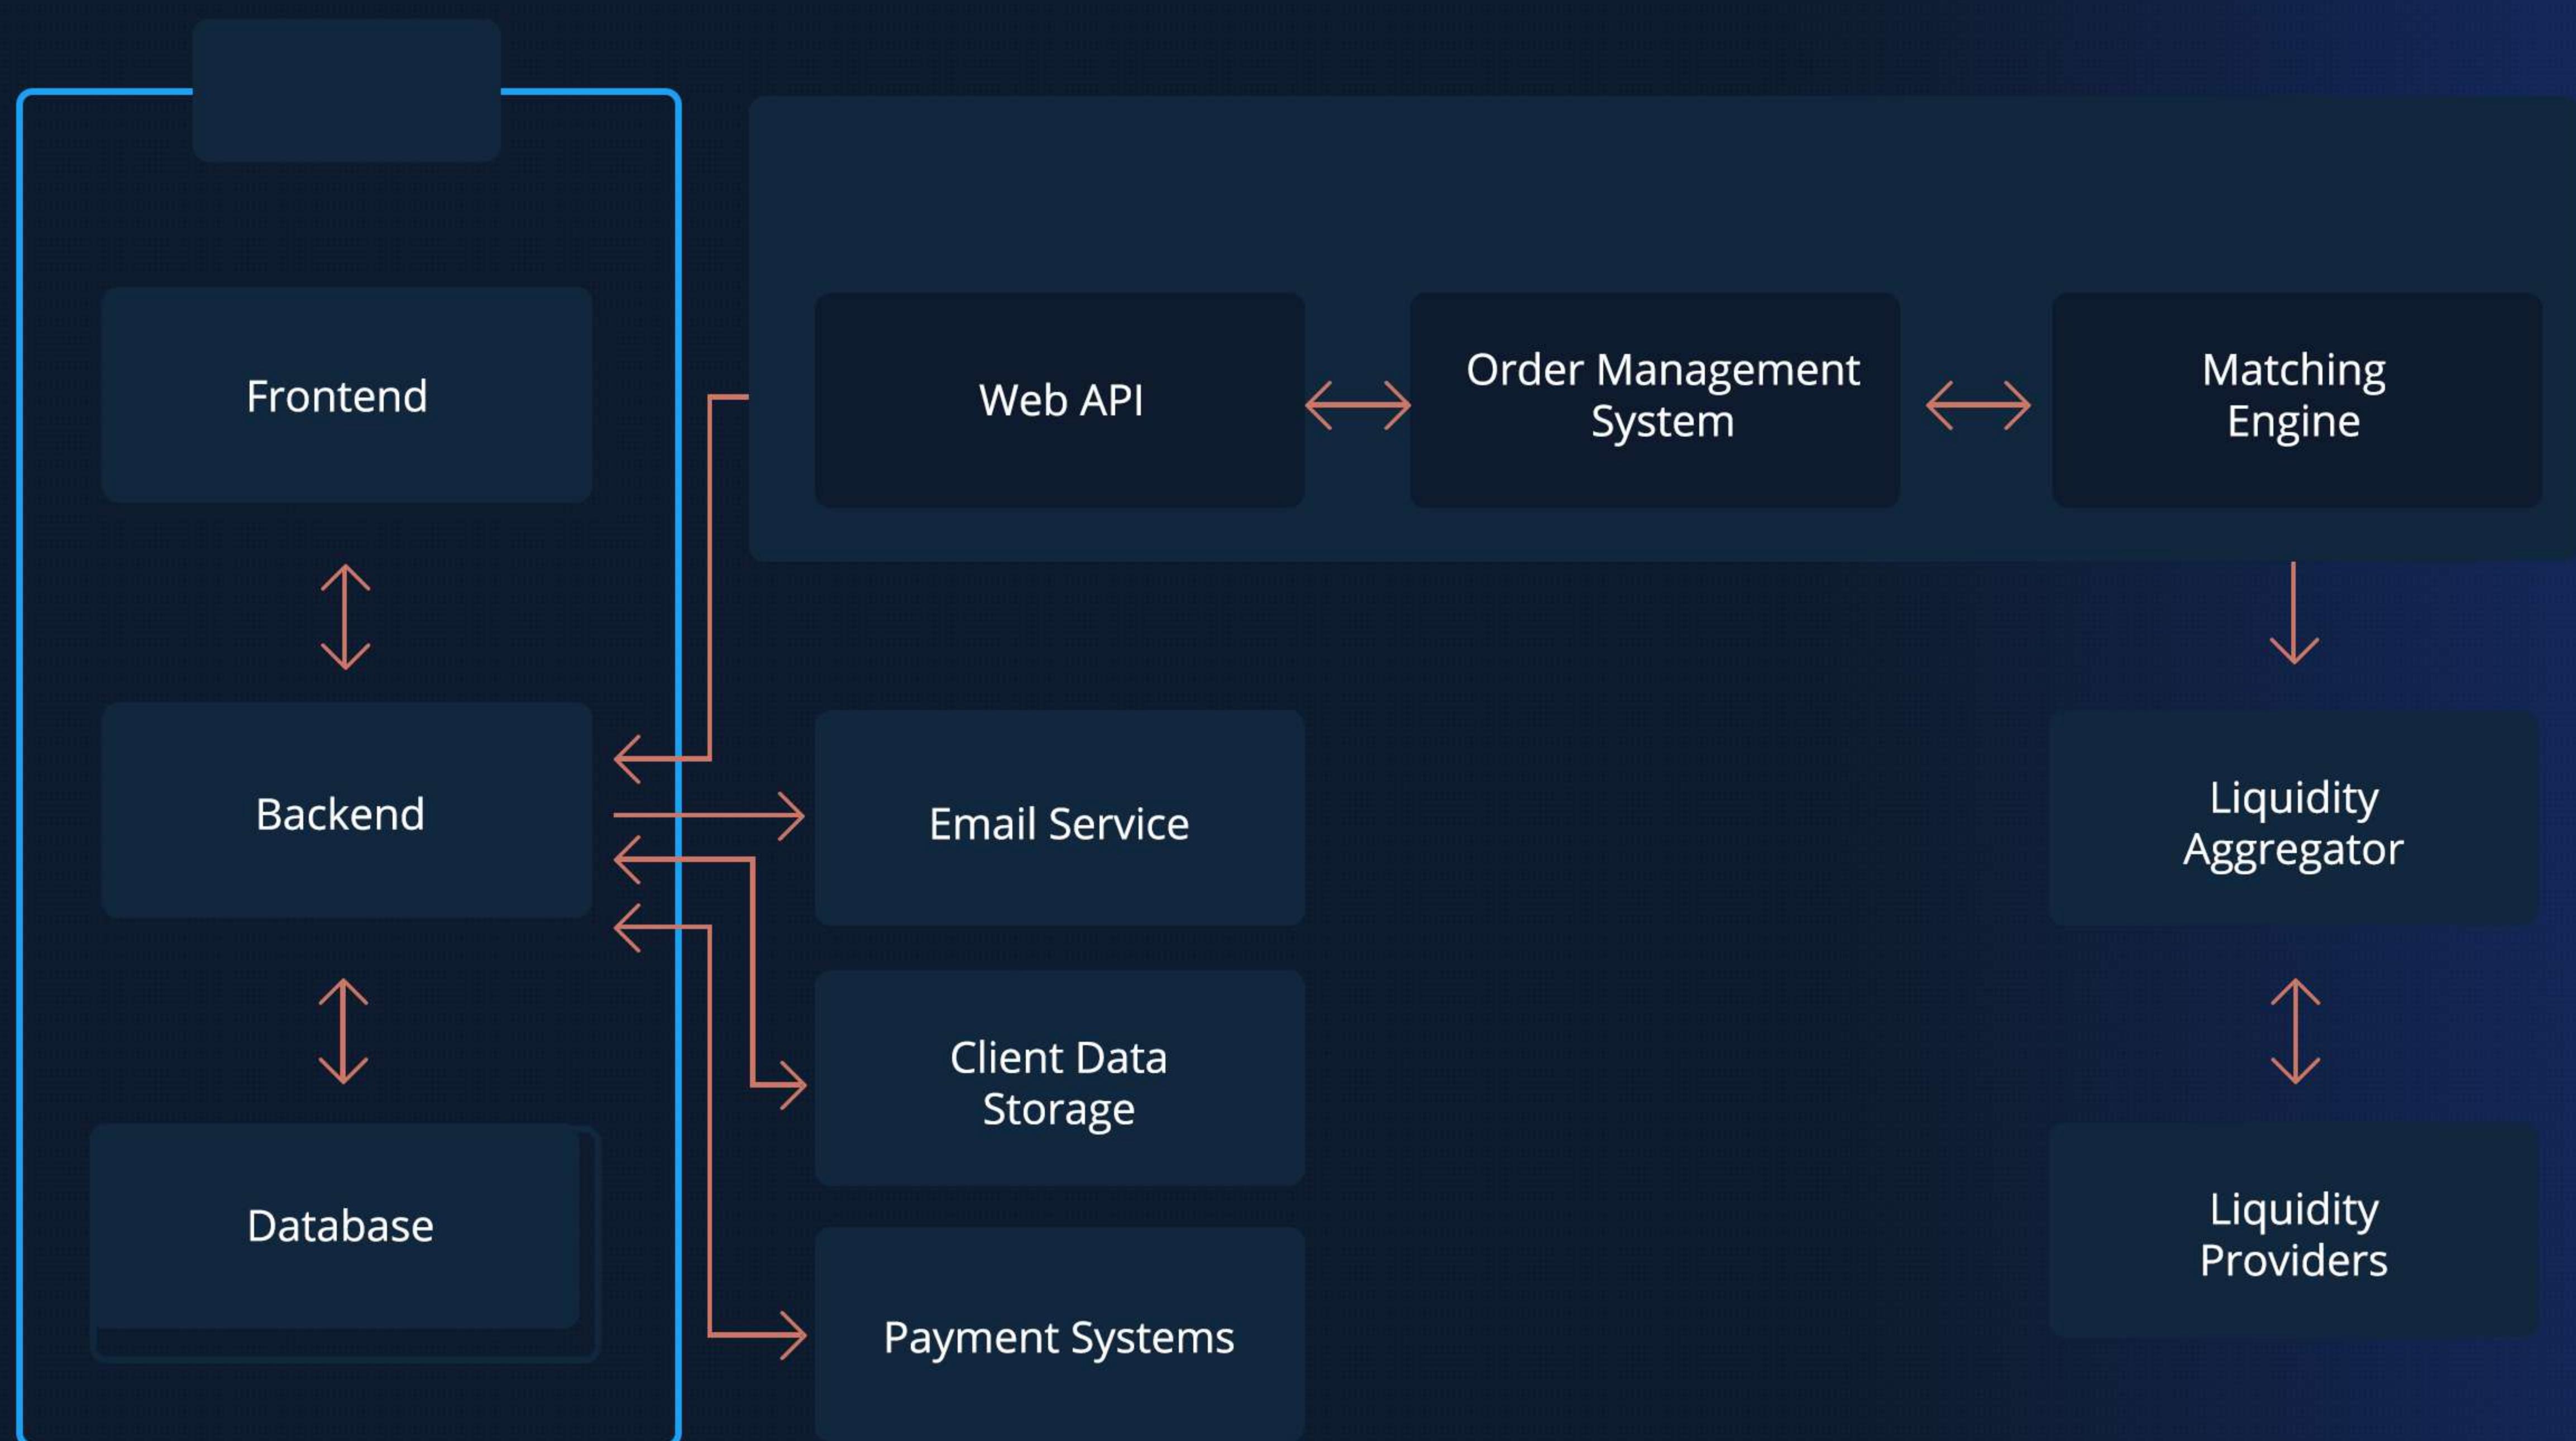

Bitcoin accept check aprove transfer < 10 minutes

Cryptocurrency transfers are not just cheaper than bank or card transfers, but much faster. Your clients' money is not held up in a bank payment system or similar for days or weeks, but is available for them on their trading accounts in as little as a few minutes.

This has the added benefit of greatly decreasing the time period from when your client first saw your advert and the time that he starts trading.

CRYPTOCURRENCY EXCHANGE STRUCTURE DIAGRAM

A cryptocurrency exchange is a complex IT solution combined from several components. The frontend is integrated to the Exchange module which is connected via Web API.

Secure connection between components

All parts of the solution are customizable

The matching engine can work with internal and external liquidity

ANTI-FRAUD SYSTEM

Our turnkey solution restricts below activities to make the ecosystem safe & secure

- ✖ Excessive Deposits Sum
- ✖ Multiple withdrawals with No Trading Activity
- ✖ Identical Withdrawal Wallet Address used by Multiple Accounts
- ✖ Identical Phone number Used by Multiple Accounts
- ✖ Identical IP Used By Multiple Accounts
- ✖ Excessive Trades Amount
- ✖ Arbitrage Triangle
- ✖ Identical Email Used by Multiple Accounts
- ✖ Frequent Deposits

RELIABLE AND SCALABLE HOSTING FOR EXCHANGE IN AWS

Ment Tech uses hosting solutions that dynamically scale resources as the client base grows and supports the most demanding and highly loaded projects.

We prefer Amazon Web Services (AWS) hosting because it offers high levels of availability, scalability and performance, requiring higher amounts of management and administration that we organize entirely on our side.

UTILITY (LOYALTY) TOKEN

The ability to issue a utility token and give it functionality. For example, a token may allow a discount on trading commission.

ALL PRODUCTS ARE BUILT TO WORK TOGETHER

Enterprise Wallets

MT Trading Engine

Liquidity

MT CRM

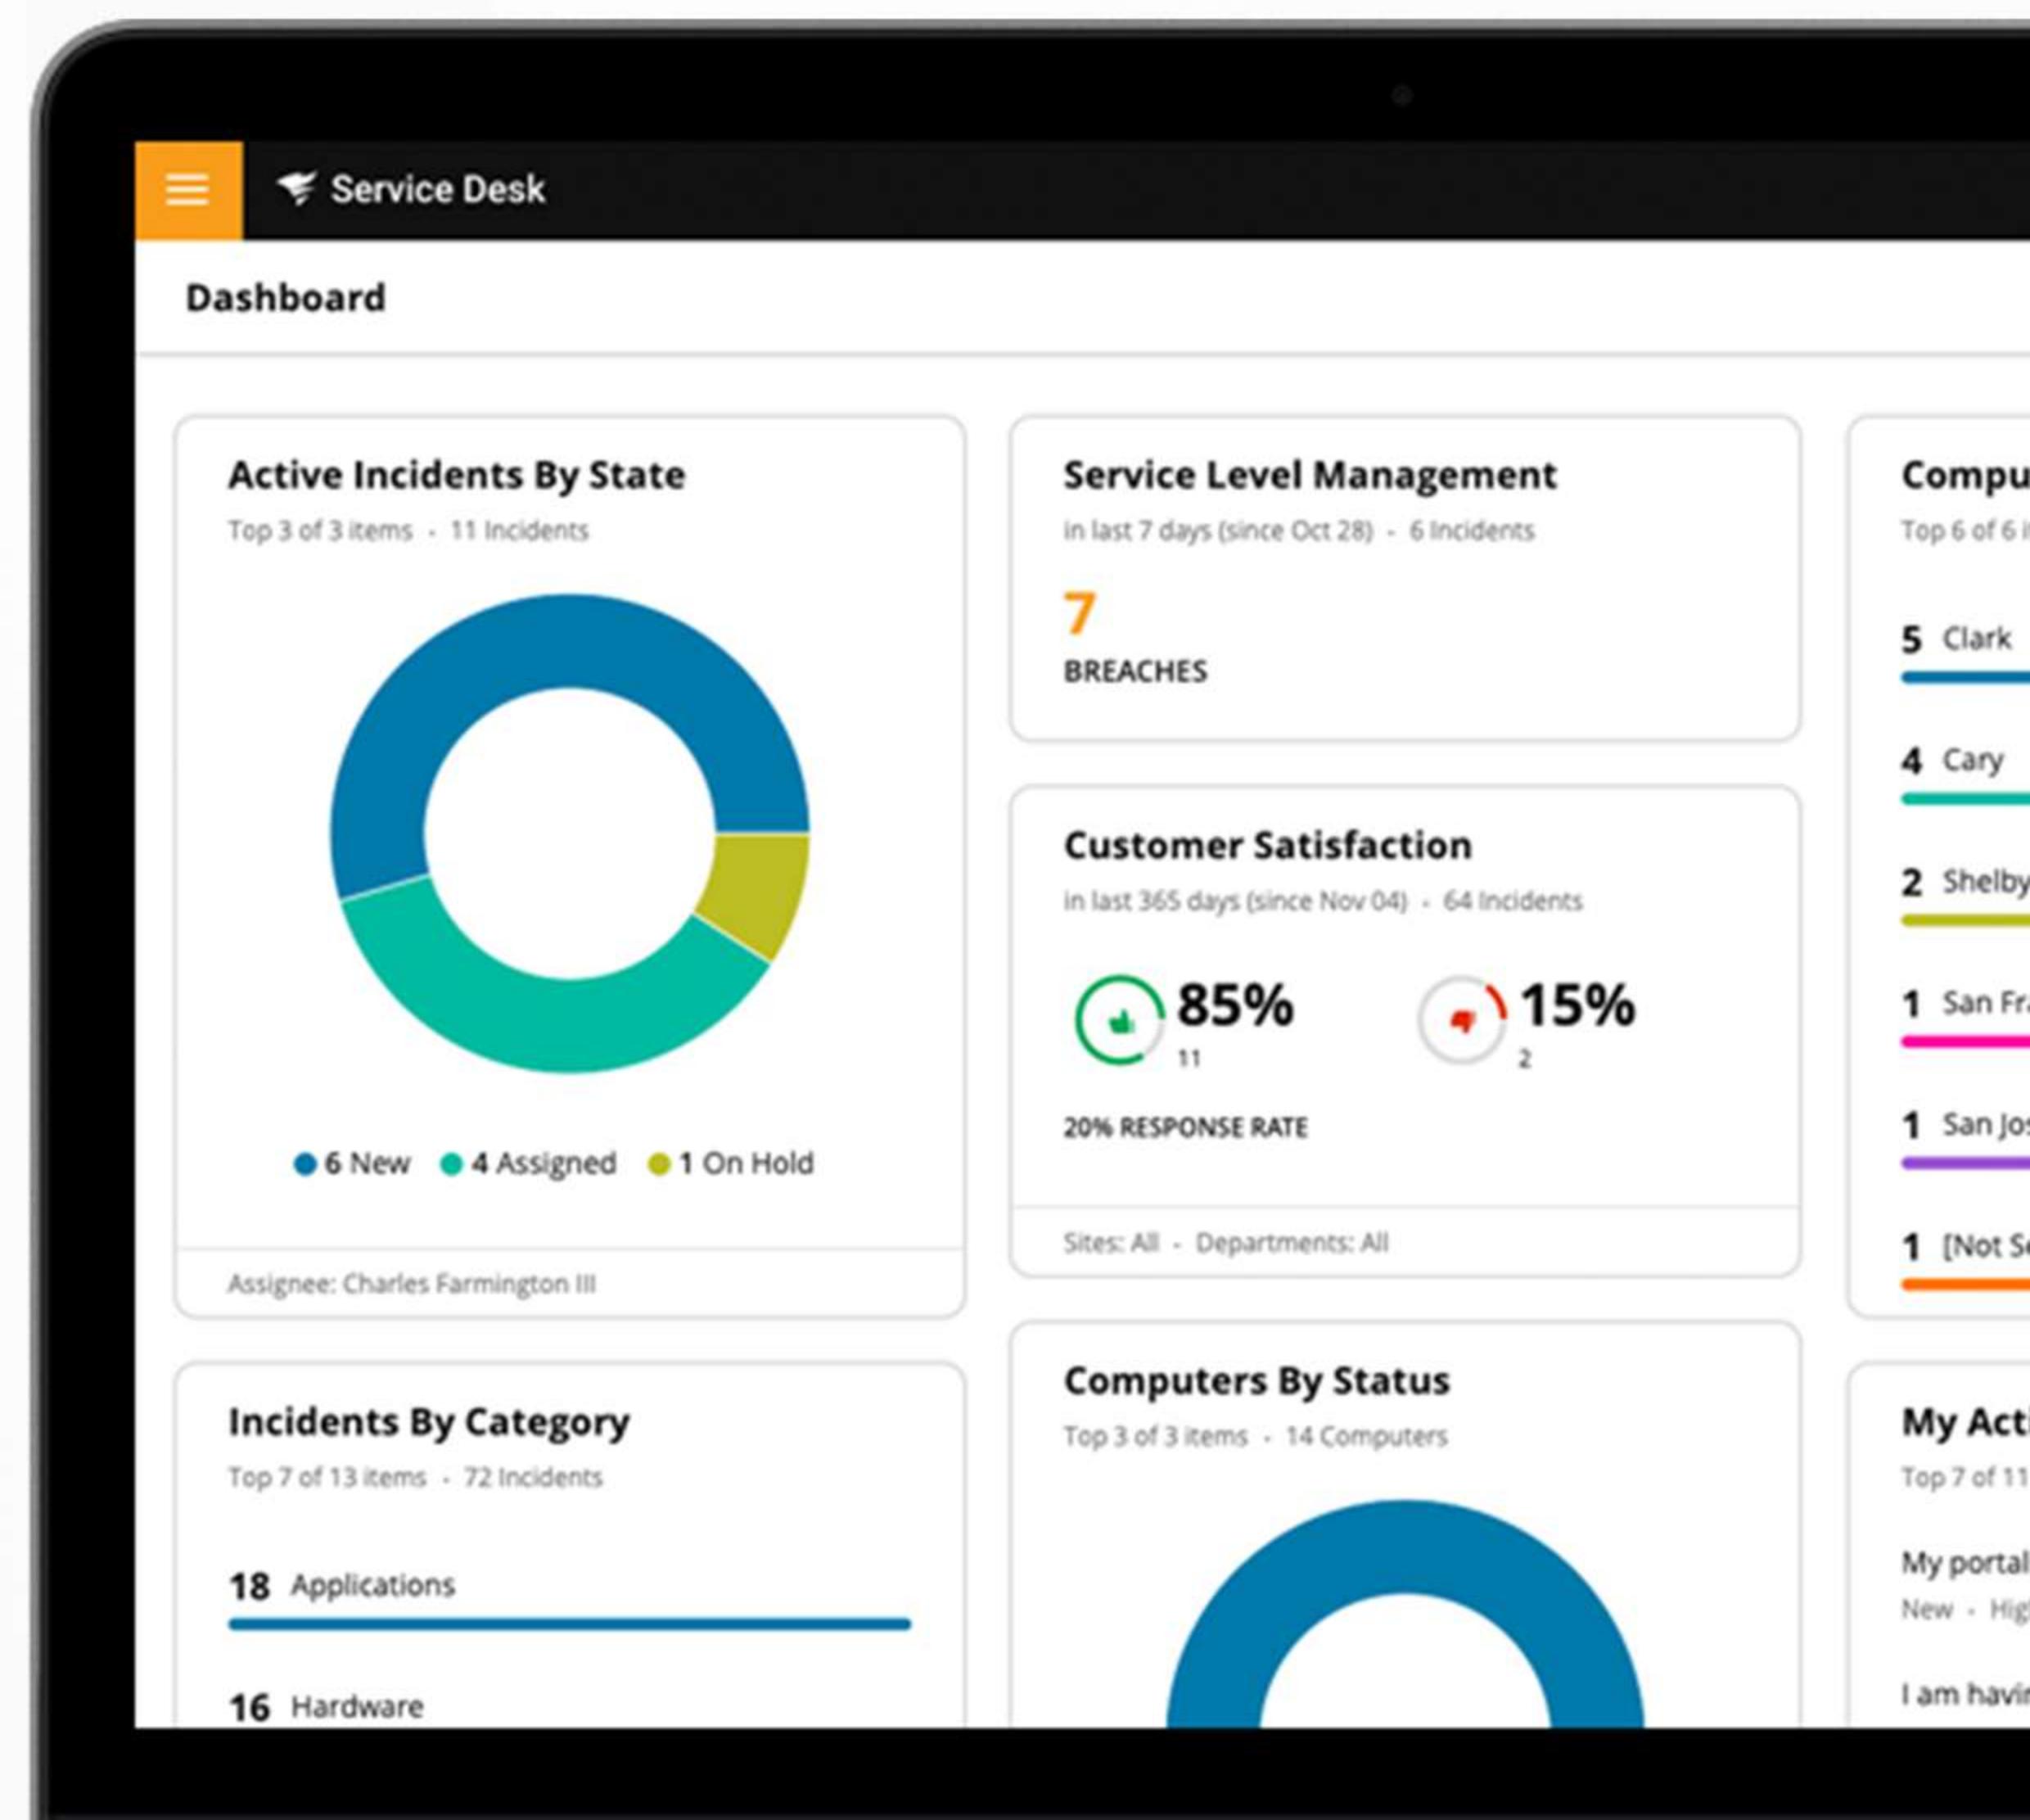

Widgets

Our engineers work closely to deliver products that are thoroughly tested and work well together. All our products are already integrated with each other and are ready to go live.

We have a proven deployment process and conduct tests, firstly during the development of any software, secondly, prior to all updates of the live environment and also before any updates of the trading servers.

MANY PRODUCTS- SINGLE SUPPORT TEAM 24/7

If something happens and you need help, we will never say, "Sorry, it is not our duty" and refer you on to someone else. Our technical support team logs everything, including all details and comments from developers across our entire product range and will help you without asking you numerous questions.

TUTORIALS & MATERIALS

Ment Tech Labs is committed to working alongside its clients to ensure ultimate user satisfaction. An extensive range of tutorials and materials is available to assist with all technical aspects.

EDUCATION

Education is an all-important part of our service. We offer a variety of training materials including videos and demos to help our clients understand the business.

MAJOR LANGUAGES SUPPORTED

Our knowledgeable and friendly customer service team can assist you in 8 languages including English, Russian, Chinese, Farsi, Hindi, Spanish, Arabic and Urdu.

WE ASSIGN DEDICATED EXPERTS FOR EACH PROJECT

PRODUCT/PROJECT MANAGER

All our clients are assigned a personal project manager who is always on hand to answer questions and deal with all their requirements.

DEVOPS & QA ENGINEER

Our DevOps & QA Engineer are deeply knowledgeable about our technical solutions and are there to assist our clients with any specifics needed.

UI & GRAPHICS ENGINEER

Our UI & Graphics Engineer will make sure to match the product UI/UX according to your company theme & UI kit and will help you with your business website landing page.

CRYPTOCURRENCY EXCHANGE LIQUIDITY SOLUTION

Liquidity is important for all tradable assets including cryptocurrencies. Low liquidity levels mean that market volatility is present, causing spikes in cryptocurrency prices. High liquidity, on the other hand, means there is a stable market, with few fluctuations in price.

WHAT IS CRYPTOCURRENCY LIQUIDITY SOLUTION?

The term liquidity is generally used in the financial markets to describe the ease by which an asset can be converted into cash without difficulty. In terms of cryptocurrencies, liquidity is the ability of a coin to be easily converted into cash or other coins.

Liquidity is important for all tradable assets including cryptocurrencies. Low liquidity levels mean that market volatility is present, causing spikes in cryptocurrency prices. High liquidity, on the other hand, means there is a stable market, with few fluctuations in price.

It is thus easier to buy or sell cryptocurrencies in a liquid market since buy or sell orders will be filled more quickly due to the larger number of market participants. Essentially, this means it is possible to enter or exit a trade at any moment, given the fast-paced nature of the cryptocurrency markets.

Market Pair	Liquidity Venues	Execution From	Exchanges Connected
100+	5	5ms	50+

WHY IS LIQUIDITY SOLUTION IMPORTANT?

High liquidity in the marketplace is an ideal situation as it makes for improved prices for all concerned due to the large number of buyers and sellers in the marketplace. A buoyant marketplace with a high level of trading activity tends to create an equilibrium market price that is acceptable for all.

High liquidity also ensures that prices are stable and not prone to large swings resulting from large trades which could affect cryptocurrency prices while fuelling increased volatility and risks for the general market. In a liquid market, prices are stable enough to withstand large orders because of the large number of market participants and their orders.

High liquidity also allows for greater technical analysis accuracy since price and charting formation in a liquid market is more developed and precise.

CRYPTO EXCHANGE LIQUIDITY SOLUTION

Our Leading Liquidity System provides liquidity of over 100 mainstream currency pairs and popular currency pairs, as well as top trading depth and continuous K-line charts.

Leading Liquidity System

It provides liquidity of over 100 mainstream currency pairs and popular currency pairs, as well as top trading depth and continuous K-line charts.

All Transaction Types Are Supported

It provides solutions for spot trading liquidity, futures trading and OTC trading liquidity.

Professional Hedging Strategies

With professional hedging strategies, the exchange can manage its own positions.

Transaction Fees Rate and Spread

It supports flexible settings of spreads and commissions on the basis of aggregate quotations, so as to adjust and control costs and incomes.

CRYPTOCURRENCY LIQUIDITY

We have spent many years building a deep liquidity network and investing in our pricing technology. This means we can offer you ultra-competitive pricing and great execution on a wide selection of markets. Our FOREX liquidity is incomparable in the industry.

LIQUIDITY AGGREGATION BOT

Our Liquidity Aggregation bot brings order-book and trade history data to your exchange from other exchanges with huge volume like Binance, Huobi etc. It is the best solution to make your exchange look alive even being new to the market.

MARKET MAKER BOT

The system provides better liquidity and depth of transaction, helping exchanges, brokers and institutional investors reduce costs and increase efficiency

CRYPTO CFD LIQUIDITY

CFDs are a convenient way of trading cryptocurrencies. Ment Tech offers an incomparable Crypto CFD solution aggregating cryptocurrency exchanges, non-bank liquidity providers, cryptocurrency brokers, OTC orders of institutional clients, hedge funds and thousands of client-broker orders to create the deepest liquidity pool in the industry to meet all our client's needs.

ENTERPRISE LIQUIDITY SOLUTIONS

Liquidity is important for all tradable assets including cryptocurrencies and traders need to have transactions completed as quickly and as cost effectively as possible. LESS VOLUME ? No Worries! Our Enterprise Liquidity Solution will let your trades executed from other exchanges with huge volume like Binance, Huobi etc.you'll never have to worry about ID verifi-

OTC PLATFORM TURNKEY SOLUTION

OTC deals involve a wide range of assets — from commodities to financial instruments like cryptocurrencies and derivatives. Unlike traditional exchanges, the OTC market is decentralized and has no physical location, and trading is done via dealer networks. Traders are not necessarily involved in the process directly, as they can seek assistance of middlemen, like brokers, etc.

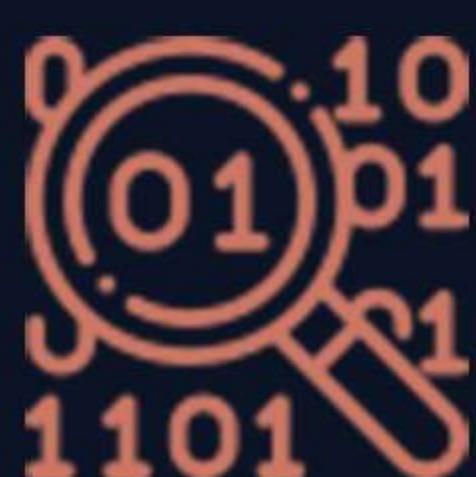

Get OTC TRADING SYSTEM expand your Ecosystem

Save months and years of development time and costs. Instantly set up your own world-class trading desk and customize it with your own branding. This P2P solution is even ideal for existing exchanges because Ment Tech eliminates real and perceived conflicts of interest associated with non-transparency, intermediaries posing as counterparties. Buyers deal directly with sellers.

Whether you are trading blocks of \$100,000, €10,000,000 or 2,000 Bitcoin, the OTC desk will provide you with execution and settlement services that are discreet, secure and ultra-competitive. Our OTC desk can support all fiat currencies and digital assets currencies for the coverage of global markets.

In Over-the-counter (OTC) trading, we offer deeper liquidity and a private, more personalized service to institutions and high net-worth individuals needing to fill large orders. Each transaction will be audited by the system, risk rate will be calculated in real time.

THE PROBLEM: AN OUTDATED PROCESS

VULNERABILITY

Current exchange platforms (Whatsapp, Telegram, Skype, etc.) pose significant vulnerability risk. Hackers can infiltrate and hijack trades, resulting in the loss of millions of dollars.

NO DISCOVERY

Lack of discovery tools for more legitimate and verified sources prevents small and medium-sized funds from being found and prevents growth, restricting the industry to remain stagnant as more significant players in the space receive all the traffic.

TRANSPARENCY

The layer of anonymity that OTC trading provides prevents the collection of valuable data on OTC traders.

DISTRIBUTED

There are too many platforms that exist and it can be challenging to keep track of all of them.

NO END-TO-END SOLUTION

No platform currently offers a complete solution.

INEFFICIENT

Long, slow, lengthy, and inefficient trading process. Current platforms can take hours or even days.

QUICK PRODUCT TOUR

Our software plugs seamlessly into your onboarding process, allowing full control of who can use your platform.

Every trader goes through a KYC process, designed to eliminate fraud. Your customers can link their custody wallets to the platform as proof to other traders that the posted assets are in their full control.

The screenshot shows a step in the KYC process titled "Document Verification". It instructs the user to upload any of three types of documents: Passport, Identity Card, or Driver License. There are input fields for "Passport: Number" and "Expiration Date DD/MM/YYYY". Below these is a large dashed box for "Upload your Photo ID" with instructions: "Drag and drop or browse files", "Maximum file size is 10MB", and "Maximum number of files is 5". A "Submit" button is at the bottom.

The screenshot shows a "Create Payment Method" page. The "Bank Transfer" tab is selected. It includes fields for "Reference Name", "Bank Name", and "SWIFT Code". A "Submit" button is at the bottom. Below this is a table titled "My Payment Gateways" showing one entry for "Bank Transfer" with status "ACTIVE" and a "Deactivate" button.

Traders get full control. Users verify and validate deal details before executing each trade. Security is enhanced with 2-Factor Authentication (2FA) to ensure safety.

Once the trader confirms execution, the trade is settled instantly. Blazingly fast.

OTC platform locks in asset prices for 30 seconds while the deal is completing negotiations. This gives traders time to reconsider, re-price, validate or cancel.

In Over-the-counter (OTC) trading, we offer deeper liquidity and a private, more personalized service to institutions and high net-worth individuals needing to fill large orders.

The screenshot shows the OTC trading interface. On the left, a sidebar lists available coins: Cardano ADA/USD, BTC/USD, DASH/USD, ETH/USD, LTC/USD, and XRP/USD. The main area has two forms: "Buy ADA" and "Sell ADA". Both forms have fields for Price (USD), Amount (ADA), and Total (ADA). The "Buy ADA" form also includes a "Payment Methods" section with a checked "Bank Transfer" option. Below these are "Order Book" tables for buying and selling ADA. The "Buy" table shows four entries with details like Price (USD), Amount (ADA), Total (ADA), and Seller [AVG Release / Merchant Online]. The "Sell" table shows one entry. At the bottom are tabs for "Open Orders", "Open Proposals", "Appealed Proposals", and "All Proposals", along with a table of order details.

INDUSTRY LEADING FEATURES

Exclusive Access to the Best Deals

Access quality, exclusive deals securely, right in our platform

Insured Upto 5 Million

Get peace of mind from any loss due to theft, hacking, or malicious activity.

Auditable Transactions, Secure Trading

Perform background checks and verify each trade and user. Every transaction is audited.

Why Choose Ment's Crypto Staking & Defi Lending Turnkey?

Leading exchanges, custodians and apps rely on Ment's secure, reliable and non-custodial infrastructure to earn rewards for their customers. Ment Tech supports the broadest range of crypto assets with a single integration

Leverage Crypto Staking & Defi Lending Turnkey high availability infrastructure, 24/7/365 devops support, comprehensive APIs, audited smart contracts and block-level reporting to offer fixed income services for 30+ PoS and defi assets.

Our Crypto Staking & Defi Lending Turnkey has never been slashed, hacked or experienced extended downtime in 3 years on many different networks.

Programmatic access to all staking, defi lending and reporting functionality makes integrations easy and seamless. We support a wide variety of node types, custody setups and even custom versions of Ment Tech defi lending service.

CRYPTO STAKING & DEFI LENDING MADE EASY

Crypto Staking & Defi Lending technical infrastructure was designed from the ground up for the unique requirements of crypto networks. We deliver rewards reliably while minimizing slashing risks.

Crypto Staking & Defi Lending technical infrastructure was designed from the ground up for the unique requirements of crypto networks. We deliver rewards reliably while minimizing slashing risks.

We have spent considerable resources implementing and testing proprietary software that prevents double signing in a highly fault tolerant setting.

Our technical infrastructure has been audited by security and devops teams at the leading protocols, exchanges and custodians.

FAASTEST, MOST SECURE AND SUCCESSFUL CRYPTO STAKING & DEFI LENDING TURNKEY SOLUTION

Staking is a great way to maximize your holdings in staking coins and fiat that would otherwise be sitting in your exchange account. Once you have staked your assets you can earn staking rewards on top of your holdings and grow them further by compounding those future rewards.

How Our **MINING SOLUTION** Works?

Everyone can start mining without the need for deep technical knowledge about cryptocurrency mining. It is tailored for ease of use and features a very simple interface. When running, Miner is connected to exchange platform and Ment Tech open hashing power marketplace.

Miners select the algorithm and the speed while r miners mining the software fulfil that order by mining (hashing) - providing computing power to the network and get paid in the currency they mine.

Users rent or combine hashing power to earn block rewards for a range of blockchains. Simple dashboard gives you a quick overview of the most important information. You start mining with only one click! Control every device in your system. Monitor the temperature, load, fan RPM and profits. Precise benchmarking process will determine the most profitable algorithms for your hardware but you can always manually select the algorithms you want to support.

THE SOLUTION

Infrastructure to power your ecosystem with mining solution.

Users rent or combine hashing power to earn block rewards for a range of blockchains.

It supports multi-cryptocurrency mining and its hashrate ranks among the top rankings in the world. Our Mining Pool is safe, stable, profitable and has good services.

Our Mining Pool offers the first in the industry to develop and take advantage of "the Hashrate Firewall"

MINING POOL SYSTEM

Everyone can start mining without the need for deep technical knowledge about cryptocurrency mining. It is tailored for ease of use and features a very simple interface. When running, Miner is connected to exchange platform and Ment Tech open hashing power marketplace.

Plugins

Plugins allow you to install 3rd party miners and turn your NiceHash Miner into the most advanced mining platform.

Device Monitoring

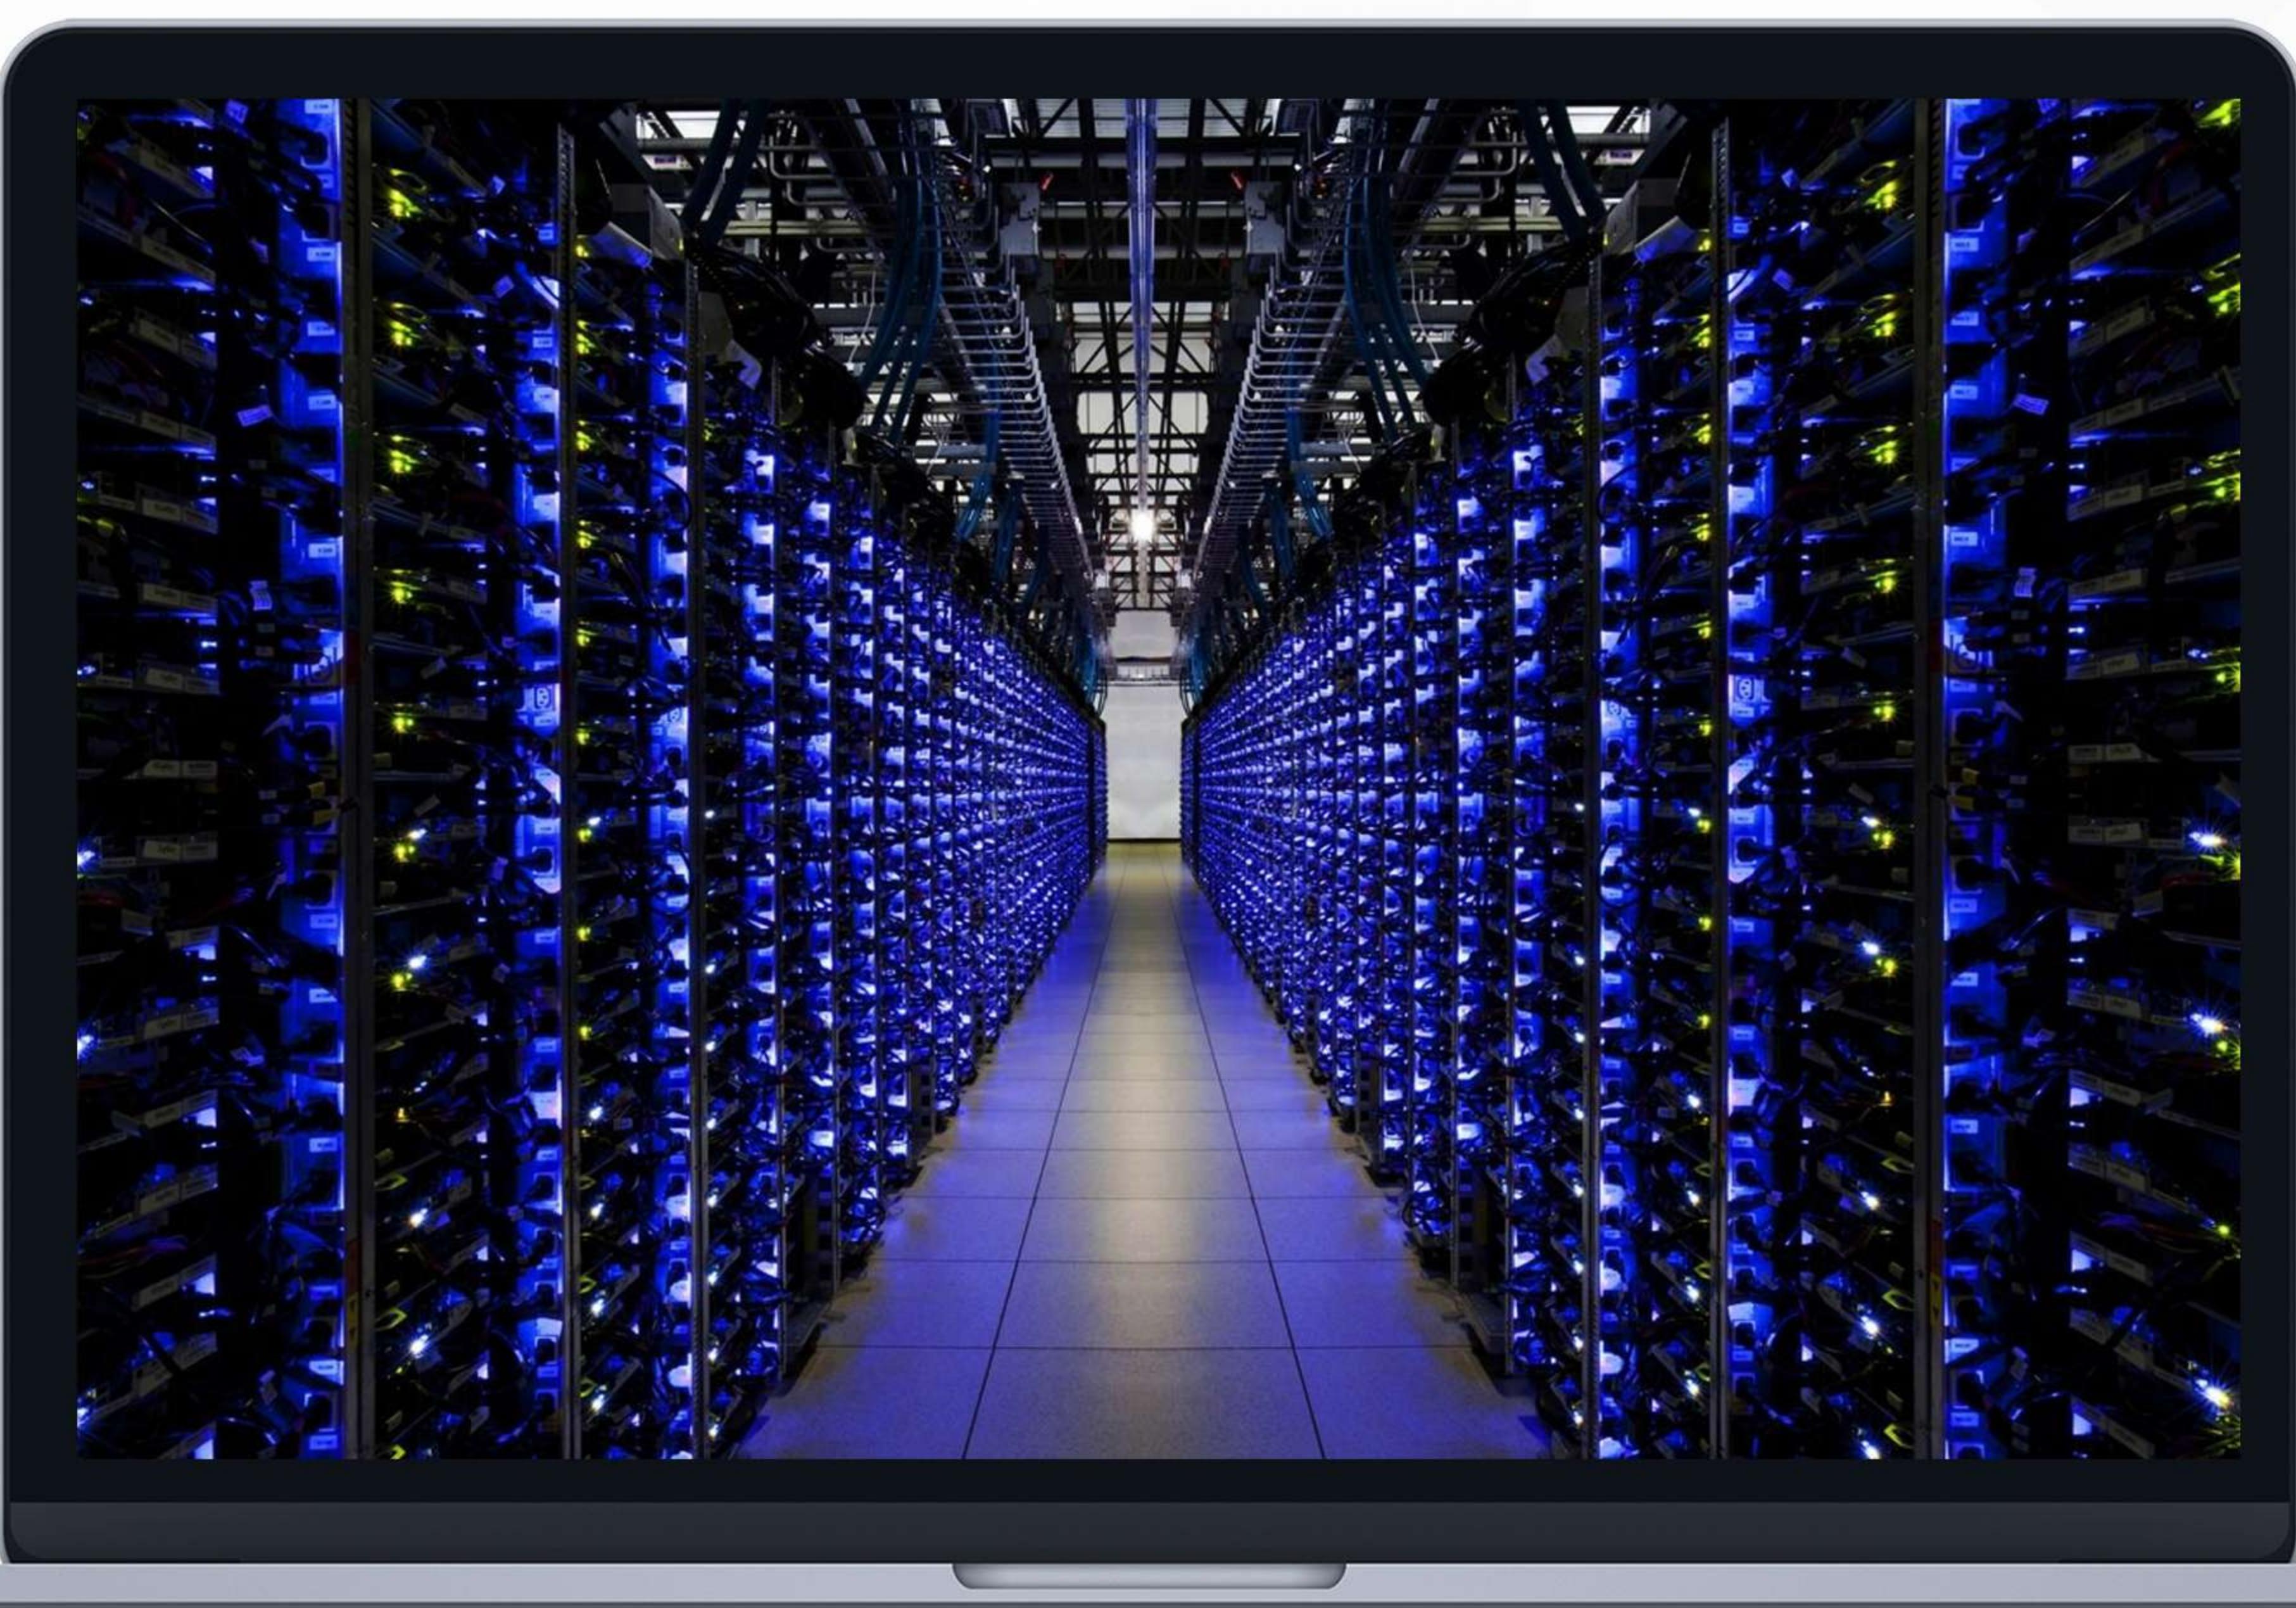

Control every device in your system. Monitor the temperature, load, fan RPM and profits.

Simple & Efficient Dashboard

Simple dashboard gives you a quick overview of the most important information. You start mining with only one click!

Benchmark

Precise benchmarking process will determine the most profitable algorithms for your hardware but you can always manually select the algorithms you want to support.

Why Choose Referral & Affiliate System?

If you're looking for a 100% affiliate / referral plugin for your Cryptocurrency Exchange, you should know that our Affiliate & Referral system is the best and the most cost-effective in the market. There's no need to buy expensive affiliate plugins just to have a simple referral system onto your Cryptocurrency Exchange.

With this plugin/module you can easily extend your cryptocurrency exchange platform with a referral system. Immediately after the plugin activation you'll be able to give your users the ability to refer your exchange platform and also to check how many and who really did registered by their referral. This plugin tracks registrations as well as rewards.

The administrators will see in Users list two new columns: User ID and Referral ID along with Rewards. This way administrators have full control and a clear picture of their referrals activity.

REFERRAL & AFFILIATE PROGRAM MADE EASY

Real-time reporting & email notifications for affiliates

Option to pay your affiliates with Crypto or Fiat (mass payments)

Unlimited referrals, unlimited affiliates with statistics (per month, per user)

REFERRAL & AFFILIATE SYSTEM

Our referral and affiliate system let you users bring traffic to your business in return of great crypto awards. Referral and affiliate system is the best way to enhance your business these days.

WHY BECOME AN AFFILIATE?

EARN SOME BITCOIN

GROW YOUR NETWORK SUPPORTED

CASH OUT ANYTIME

HOW DOES IT WORK?

1. INVITE YOUR FRIENDS

Share your unique link or QR code with your friends and have them invite theirs with their own Affiliate links.

2. GET THEM TO TRADE

Every time they buy Bitcoin, you get 50% of their escrow fee as commission. You also make 10% of the escrow fee every time one of their affiliates buys Bitcoin on Exchange.

3. GET PAID

Your earnings automatically build up in your affiliate wallet. You can cash them out anytime by moving them to your Exchange wallet.
